Dear Dinyar:

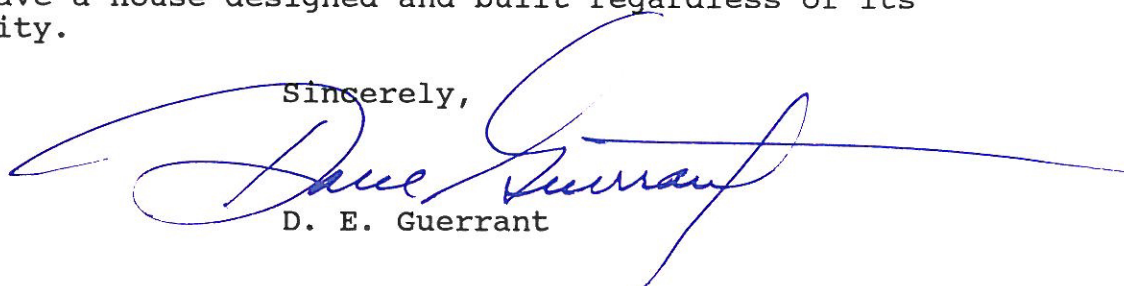

I am pleased to provide a letter of recommendation for you and your associates. As you well know, Charlotte and I love our classic white Georgian and think very highly of the design, quality of construction and finishes throughout the house.

The front to back two-story center hall with its wide gracious stair to the second floor has an effect on us and all who visit our home. The high ceilings and the generous proportions of the living room and dining room are very comfortable, and the circulation is just right for entertaining. The large family room and the library are just what we had hoped for. We love the master bedroom with its sitting area and many closets. I especially like the way you situated this house, maximizing the views and the approach to the house with a well-proportioned circular drive with ample space to park when we have company. Also and perhaps more importantly, your people did an exemplary job on the construction. It feels so solid. Our friends feel it's an older house which was refurbished. We have a difficult time convincing them that it's a new house. No one believes that old world charm with all its complexities could be blended harmoniously with today's amenities to have a near perfect house.

Because a large home is somewhat complex in its mechanical systems, etc., prior to taking occupancy I had engineers thoroughly examine the house for items which you might have overlooked. None of them found a single item that they could comment on. The few minor items we added after moving in were well handled by you and your staff so that our home has been completely satisfactory in every detail from the first day we moved in.

I take pleasure in recommending Wadia Associates Inc. to anyone who wishes to have a house designed and built regardless of its size or complexity.

Sincerely,
