

# Gary Julian

Dear Dinyar,

Working on a house designed by John Russell Pope and built in 1917 was certainly a challenge that not many architects would dare to take on! We were so glad that you took this challenge and we cannot be happier with the results.

Adding the breakfast room and connecting the main house with the cottage was nothing short of inspirational. It has made our house so much more functional. We love to eat and enjoy the time in the new spaces you so cleverly created. The house has a wonderful flow to it now and everyone who spends time with us enjoys it so much that it is hard for them to leave.

We cannot thank you enough for the seamless integration from the initial meetings, the cleverly conceived conception of the plans, and the attention to every detail. No stone was left 'unturned' and the result is nothing less than spectacular.

Sincerely,

Gary Julian
