

LON MOELLENTINE

To Whom It May Concern:

When we decided to renovate and expand our 1920's English style home, we turned to Wadia Associates who had worked extensively on our house for a previous owner. We felt Dinyar's familiarity with our house and his firm's reputation for creative architecture and quality construction perfectly suited our needs and requirements.

We were not disappointed. Dinyar and his colleagues conceived a uniquely creative design which completely fulfilled our needs and indeed surpassed our expectations.

Our original intent included a major kitchen renovation with a provision for a library and playroom for our teenage daughter. We were also very concerned about maintaining the character, style and integrity of our existing home. Wadia Associates presented us with an inspired solution. A wonderful kitchen, a computer study area, a vaulted window lined gallery, and an absolutely magnificent timber frame library dramatically soaring thirty feet, with all of these rooms surrounding a charming courtyard.

This design was accomplished through the meticulous analysis of the architectural elements of the existing structure such as the original brick, limestone arches, English doors and leaded windows resulting in a major extension to the home which is totally seamless, where even we forget where the old and the new meet. Development of the internal space was equally inspired with an elegant oval room with delicate custom plaster moldings, exquisite walnut bookcases, and several classic Gothic arches that take our breath away every time we look at them.

Implementing this wonderful design involved requesting a variance from our town's Zoning Board. Dinyar's reputation and obvious currency with the Board was instrumental in securing our approvals as Dinyar steered us successfully through this daunting process.

We are thrilled with the inspired design and elegant feeling of our new space.

Sincerely,

Lon & Morley Moellentine
